

NOISE REMOVAL with AUDACITY

DWRL AVR6 Workshop 26/2/14

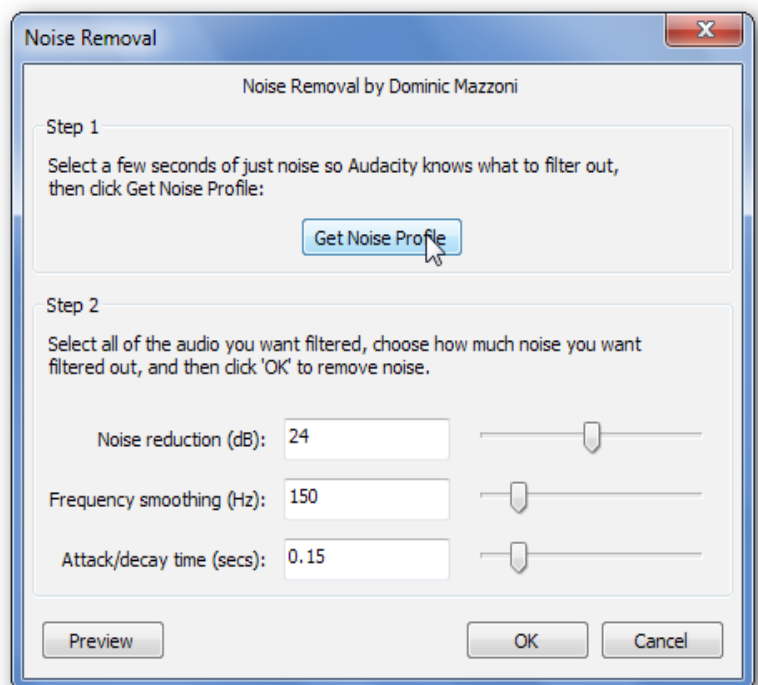

- 1 Open your track in Audacity and select the longest stretch of 'silence' -- i.e., background noise.

- 2 Go to 'Effect' / 'Noise Removal'

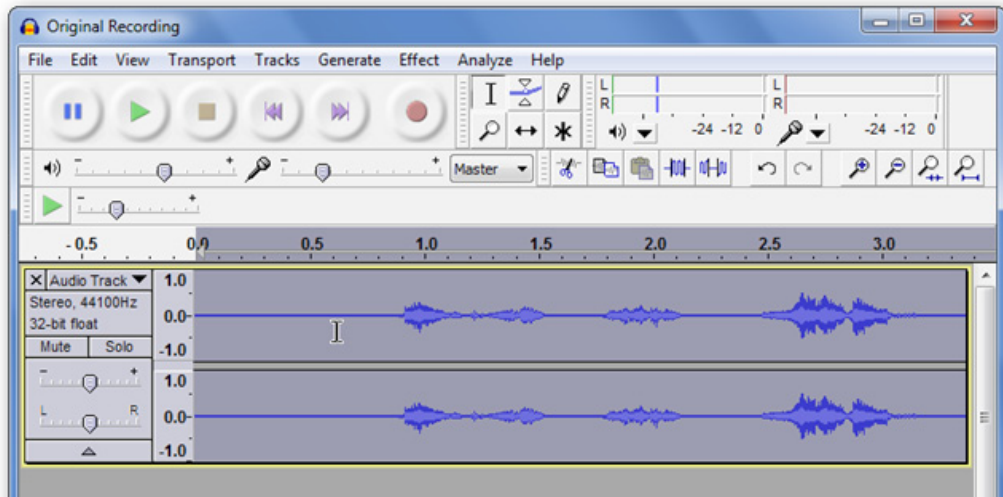

- 3 Select 'Get Noise Profile'

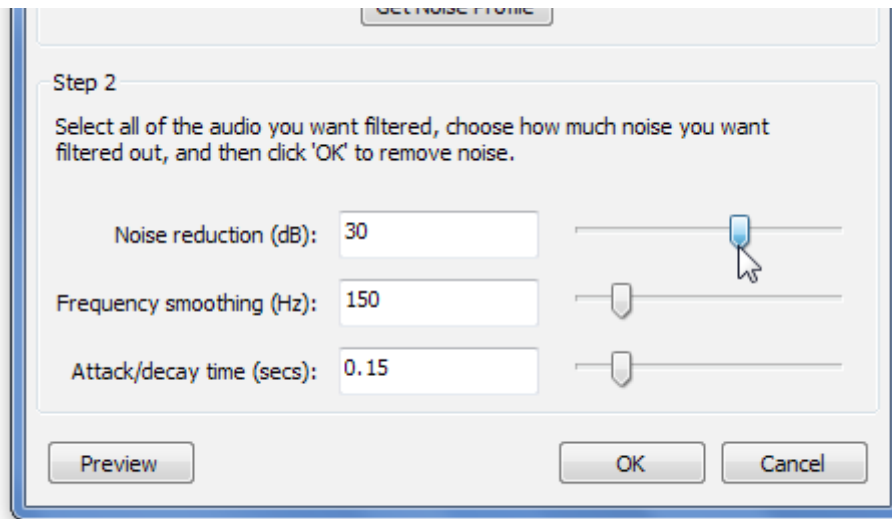

NOISE REMOVAL with AUDACITY

- 4 Select the portion of your track from which you want to remove noise (probably all of it!).

- 5 Back to 'Effects' / 'Noise Removal'. The sliders change the removal settings. Click 'Preview' for a snippet of your track or 'OK' to remove noise.

*Enjoy your
noise-free
audio!*
